

2. Amendments to the Claims:

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- 1.-10. (Cancelled).
11. (New) A system for giving a presentation, comprising:
 - an internal communication network adapted for access by a device, but not adapted for access by a wireless device;
 - an image-showing device comprising a wireless communication interface, the wireless device being adapted to make an ad-hoc wireless connection to the image-showing device, wherein the device is adapted to access the image-showing device via the internal network.
12. (New) A system as claimed in claim 11, further comprising an internal wireless device adapted to access the internal communication network.
13. (New) A system as claimed in claim 11, further comprising a base station adapted to provide the wireless access to the internal wireless device.
14. (New) A system as claimed in claim 13, wherein the connection between the wireless device and the image-showing device is not through the base station.
15. (New) A system as claimed in claim 11, wherein the wireless device is adapted to show a presentation controlled on the image-showing device.

16. (New) A system as claimed in claim 1, wherein that the image-showing device is a projector.
17. (New) A system as claimed in claim 11, wherein the wireless device further comprises a data carrier adapted to make the ad-hoc wireless connection.
18. (New) A system as claimed in claim 17, wherein the data carrier is an insertable card or a CD-ROM.
19. (New) A system as claimed in claim 11, wherein image-showing device is adapted to provide the wireless device controlled access to resources on the internal network.
20. (New) A method of giving a presentation, the method comprising:
 making an ad-hoc wireless connection between a wireless device and an image-showing device;
 providing access to an internal network to a device, but not to the wireless device;
 and
 providing access to the image-showing device to the device via the internal network.
21. (New) A method as claimed in claim 20, further comprising: providing access to the image-showing device to an internal wireless device.
22. (New) A method as claimed in claim 21, further comprising:
 before the providing access to the internal wireless device, checking whether the internal network is accessible to the internal wireless device and to the image-showing device, and if required, changing a communication over to a wireless connection over the internal network.

23. (New) A method as claimed in claim 20, wherein if it is not being used for a presentation, the image-showing device goes to a mode in which it is ready to make an ad-hoc connection.
